

# Mirage Micro™

## NASAL MASK

### PROVEN SEAL, PERFECT FIT

The latest generation nasal mask from ResMed provides personalised fit, seal and comfort for more users. Working with the proven Mirage™ dual-wall cushion,

the mask's unique MicroFit dial fine tunes the fit to suit each individual user. Intuitive to use by sleep professionals and users, Mirage Micro is the new benchmark in nasal masks.

## TECHNOLOGY HIGHLIGHT

### MicroFit dial

A choice of 24 positions at your fingertips—providing a comfortable, effective fit for more users

- **Adjustable:** can easily be adjusted while on the user's face
- **Precise:** each turn of the dial adjusts the forehead support in small increments
- **Progressive:** moves in towards the face, allowing the user to sense when the fit is most comfortable
- **Works in combination with the cushion:** as the dial adjusts the angle of the mask to the face, the dual-wall cushion adapts to enhance the seal without the need for overtightening the headgear

## USER BENEFITS

### Intuitively easy

- MicroFit dial is easily adjusted with one hand even while lying down
- Vent cover can be removed for easy and hygienic cleaning
- Intuitive mask design for easy handling, cleaning, assembly and disassembly

### Personalised fit and comfort

- MicroFit dial fine tunes the fit to suit each user's profile
- Mirage dual-wall cushion is available in five sizes, including new Small size, to fit more users
- Deep mask frame design accommodates a greater range of nasal structures

### Quiet, sleek and stylish

- Array of small, built-in vents diffuse air quietly
- Streamlined design feels light on the face

## PROFESSIONAL BENEFITS

### First-time fit for more users

- Combination of MicroFit dial and dual-wall cushion achieves a perfect fit for a range of facial structures—first time, every time
- Five cushion sizes including new Small size (cushion and frame) fit a wider range of users

### Customer satisfaction and compliance

- Increased therapy acceptance through first-time fit
- Personalised fit, comfort and seal encourage long-term compliance
- Mask parts designed for fast and intuitive assembly and disassembly
- Comprehensive user support package including travel bag and user guide with mask fitting and care instructions

### Cost and time efficiencies

- Reduced fitting and training time: dial and cushion combination seals quickly
- Reduced callbacks: ease of use and fitting
- Two frame sizes fit five cushion sizes
